Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 25, 26, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Simmonds (US5110034) in view of Applicant's admitted prior art.

Simmonds discloses a method for attachment of an electrical lead wire comprising spraying a contact material onto a surface to create a contact point, ultrasonically welding the lead wire to the contact point, and applying an electrically isolating layer over the contact point and lead wire (abstract). Simmonds does not disclose thermally spraying. Applicant's admitted prior art discloses thermally spraying (specification, page 1, paragraphs 002 and 003). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included thermally spraying as disclosed by Applicant in the method of Simmonds because, thermally spraying allows the contact point and lead wire to be connected more effectively.

Allowable Subject Matter

3. Claims 19-24, 27 and 29-32 are allowed.

4. Applicant's arguments filed 6/7/10 have been fully considered but they are not persuasive. Applicant argues Simmonds does not teach thermal spraying. Applicant is correct and Simmonds was not cited for teaching thermal spraying. Examiner noted Applicant's admitted prior art disclosed thermal spraying and is an alternative to sputtering.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
